Tishomingo®

A new and distinct cultivar of Lagerstroemia crapemyrtle plant named Tishomingo®, is characterized by its deep purple colored flowers and medium to large growth habit. Tishomingo® is a hybrid resulting from the cross of Lagerstroemia x 'Tonto' and L.x 'Catawba.'

Plant height at maturity is generally around 15+ feet, and Tishomingo® flower from early June through late August. The bark is smooth to exfoliating, and outer bark is greyish green in color, while inner bark is greyish brown (Inset A). Leaf margins are entire. Leaf shape is ovate to elliptical with a slightly elliptical to acuminate tip, and leaf bases are rounded (Inset B).

Tishomingo® roots easily with the same protocols as other crepe myrtles.

Patent #: PP25,107 **Trademark#:** 5,237,433
